

STALLION AI SERVICES

“Using the latest technology in equine breeding”

Semen Freezing Prices 2012

For the owner who wants to freeze semen from their stallion for sale in the UK, for markets overseas, or as an ‘insurance’ against injury or death.

A tailored service where we freeze semen, at a price to meet your budget and/or target dosage and for the destinations you specify. There are three elements to the cost. Stallion owners are kept informed of progress, ensuring the stallion can go home as soon as the freezing target is met.

Stallion livery per day	<i>£32.50 per day under 1 month £30 per day for 1-2 months £28.50 per day for over 3 months</i>
CCTV in stable viewable through internet	FREE
Fee per collection (probably 3 to 4 times /week)	<i>£110.00 plus VAT</i>
Fee per equine insemination dose successfully frozen (Processing, freezing and assessment)	<i>£15 plus VAT</i>

The number of doses achieved from a single semen collection varies from stallion to stallion, and from day to day. Stallions usually produce between 7 – 10 insemination doses per ejaculate. We recommend that stallion owners allow three insemination doses for each mare to be bred.

Additional costs to the stallion owner are if applicable:

- (a) Insurance of the stallion.**
- (b) Stallion transport to/from the collection centre.**
- (c) Health tests; owners will be advised of the necessary health tests and any quarantine period required (these vary from country to country) when making a booking for their stallion.**
- (d) Both routine and any emergency veterinary work.**
- (e) Farriery.**
- (f) Feed additives.**
- (g) Any additional exercise other than turning out and horse walker.**
