Semen Freezing Information & Prices 2016

Why Freeze Semen From Your Stallion?

For the owner who wants to freeze semen from their stallion for sale in the UK, for markets overseas, or as an ‘insurance’ against injury or death.

A tailored service where we freeze semen, at a price to meet your budget and/or target dosage and for the destinations you specify. There are three elements to the cost. Stallion owners are kept informed of progress, ensuring the stallion can go home as soon as the freezing target is met.

Stallion livery per day:	Month 1 - £36.50 per day Month 2 - £34.50 per day Month 3 and over - £30.00 per day
Private webcam in your stallions stable	FREE
Fee per freezing collection (approximately 4 times/week)	£135.00
Fee per equine insemination dose successfully frozen (Processing, freezing and assessment)	£15.00

All prices are subject to VAT

The number of doses achieved from a single semen collection varies from stallion to stallion, and from day to day. Stallions usually produce between 7 – 10 insemination doses per ejaculate. We recommend that stallion owners allow three insemination doses for each mare to be bred.

Additional costs to the stallion owner are if applicable:

- (a) Insurance of the stallion.
- (b) Stallion transport to/from the collection centre.
- (c) Health tests; owners will be advised of the necessary health tests and any quarantine period required (these vary from country to country) when making a booking for their stallion.
- (d) Both routine and any emergency veterinary work.
- (e) Farriery.
- (f) Feed additives.
- (g) Any additional exercise other than turning out and horse walker.

Pre-Entry Health Requirements

Before arrival to the centre your stallion must have the centres standard Pre – Entry Health tests carried out, please see the enclosed “Pre- Entry Health Certificate”. This is carried out by your vet before the stallions arrival to the centre and includes a blood sample taken and tested for EVA, EIA and Strangles and swabs taken and tested for CEM, contact your own vets directly to get a quote for this testing.

Advantages of using the Centre

- We provide a safe and controlled environment for semen collection with a team of highly trained staff
- Assessment of your stallion’s semen quality in UK’s leading equine semen Laboratory ensures that only the highest quality semen is shipped out
- We are a DEFRA approved quarantine centre and therefore are able to ship your stallion’s chilled semen throughout Europe
- We specialise in sub-fertile stallions
- The on-site freezing unit means that whilst your stallion is in residence you have the opportunity to freeze semen for both UK and Worldwide export
- We continually push the scientific boundaries surrounding the chilling and freezing of equine semen and invest heavily in carrying out research to maintain our position as number one in our field
- We share our site with one of the UKs largest equine AI and Embryo transfer centre’s with over 500 mares passing through each season

Caring for You and Your Stallion

From the moment your stallion arrives our experienced team will endeavour to ensure your stallions’ individual requirements are fully met. Stallion AI Services is the UK’S leading equine semen collection centre and we pride ourselves on the first class facilities and care we can offer you and your stallion.

Our facilities provide your stallion with a spacious stable each with a live private CCTV camera so you can check your stallion from anywhere in the world, 24 hours a day. We know how important it is that your stallions’ normal routine is maintained whilst with us, so all our stallions can be turned out daily in one of our 8 ft. high fenced grass paddocks and their fitness can be maintained on our 54ft diameter horse walker with rubberised floor and walls, perfect for the competing stallion. We continually monitor the condition of our resident stallions, all are weighed twice a week to allow nutritional requirements and exercise regimes to be monitored and amended as necessary.

You as an owner are as important to us as your stallion and we like to maintain regular contact with you whilst your stallion is in residence. We now how essential it is to market your stallion effectively and we offer an excellent promotion package free of charge for all stallions using our centre. Your stallion will receive his own private web page on our website which is looked at by breeders worldwide. Resident and ‘walk in’ stallions appear in our annual stallion brochure which is sent out to over 700 mare owners each year. Furthermore we advertise regularly in major equine publications and attend the main stallion shows and events to help promote our stallions.
